

Petition to Reform Michigan's Cottage Food Law

Restore Freedom and Fairness to Michigan's Cottage Food Producers

We, the undersigned, support removing the \$25,000 cap on annual revenue for Michigan's cottage food businesses.

These foods are safe, wholesome, and made in home kitchens by people our communities know and trust. Breads, cookies, jams, and more—crafted with care, often using local ingredients.

This isn't big industry—it's Michigan at its best. Families working hard, neighbors buying real food, and communities growing stronger.

We support **House Bill 4122** as a step toward fairness, and we also support requiring Certified Food Manager training for cottage food producers who go beyond hobby-level sales. It's a simple, responsible way to ensure safety without limiting opportunity.

We call on lawmakers to remove the outdated sales cap and support legislation that reflects what Michigan residents clearly want: the freedom to grow, the right to earn, and access to the foods we love.
